

RESTORE OUR WINTER FUEL PAYMENTS!

The new Labour government stopped Winter Fuel Payments for 10 million pensioners without warning. That mistake needs to be reversed now. **But the UK energy rip-off doesn't stop there...**

- Energy company profits have more than doubled since before the pandemic.
- But energy regulator Ofgem has still hiked up the household energy price cap by £170 since July.
- Our electricity is much more expensive than other European countries, putting jobs in key UK industries like steel at risk.

If there's a "financial black hole", put a **wealth tax on the richest in society** instead of cutting vital help for pensioners.

Privatised energy has failed all of us. Its time for our politicians to **take energy back into public control**, away from the profiteering companies.

TIME TO STOP THE UK ENERGY RIP-OFF

WE NEED A WEALTH TAX!

Energy company profits have more than doubled since before the pandemic.

The 50 richest families in the UK are worth a combined £500 billion, the same as half the UK population.

The money is there in our society if Labour chooses to tax it.

A tax on the assets of the richest 1% of people in the UK would raise £25 billion, meaning the “black hole” would be gone.

So we don't need any more cuts and hardship for working class people. **Instead, tax those who can afford it.**

SIGN OUR WEALTH TAX PETITION

Add your name to Unite's petition calling on Labour to tax the wealthy instead of cutting Winter Fuel Payments.

Scan the QR code or add your name at: **cutt.ly/TaxRich**
