

IT'S TIME FOR LABOUR TO DELIVER. NO BAN WITHOUT A PLAN.

WHAT'S HAPPENING?

- Tens of thousands of jobs are at risk right now in the North Sea. 35,000 could be gone by 2030.
- Labour wants to ban new oil licences which will put more jobs at risk.
- They're doing this without any plan about what happens next for those workers and their communities.

WHY ARE THEY DOING THIS NOW?

- Labour wants to appear "green" and because of this are rushing decisions without the cash needed to safeguard jobs and back up big talk.
- Britain has the lowest investment rate in the G7. The Government has so far committed less than £8 billion to a new National Wealth Fund. This would need to increase to nearly £400 billion to be on a par with the German National Investment Bank. Where is the money for a transition in the North Sea?
- Without investment the oil and gas workers of the North Sea will become the miners of this generation.

WHAT DO WE WANT?

- 20% of the proceeds from the Energy Profits Levy to be used to help fund Unite's Plan for a Workers' Transition:
 - Creating over 30,000 well paid, secure jobs for North Sea workers, including in wind turbine manufacturing.

LABOUR: BACK SCOTTISH JOBS

“ We cannot allow
oil and gas workers
to become the coal
miners of our
generation. **”**

Sharon Graham, Unite General Secretary
